# RETAIL STORE DESIGN & FABRICATION

Our Design Team will work closely with you to develop a 3d initial concept based on your specific brand and work-site. We value your input. Our services include design consultation, concept development and on budget estimation. Our team is flexible and can easily adapt to challenges, revisions and modifications to meet your deadlines. Sign 2000 can bring your vision to life.

## Service and Repair

If you have a sign that needs a build replaced, then replace it. A bright sign helps your customers identify your location from the road and welcomes them to your site. At Sign 2000 we provide on-demand sign repair and maintenance services at the lowest price possible. We can install, repair and upgrade all of your exterior and interior signs, even installing interim signs, quickly and cost effectively. Services include sign installation and repair; scheduled inspection, maintenance and cleaning; LED retrofits; sign re-lamping; sign removal and disposal; and merger and acquisition signage upgrades. We also have experts that service neon signs.

**1. Sign Design** – We offer complete design/build services. From the simplest banner to multi-dimensional exterior signs, our design team has the knowledge and experience necessary to make your vision a reality. In addition to full service sign and vehicle graphics design, we offer Logo Design and full service printed material design and typesetting.

**2. Sign Permitting** – Our staff is knowledgeable in the local sign code requirements and local sign bylaws. We provide complete permitting services including researching your local requirements, completing sign application forms for you, or taking care of the entire permitting process.

**3. Sign Fabrication** – From a single banner job to complex multi-sign projects we are equipped to handle all of your needs. Our fabrication team works with you and the design team to ensure your fabrication specifications are met on each and every project. Our quality assurance team ensures that color matches are correct, product and substrates meet our requirements, and the finished product meets your expectations.

**4. Sign Installation** – Our sign installation professionals are experienced in all facets of sign installation. From vehicle graphic installations and window lettering to installing illuminated pylon signs, they are expert at getting the job done right.

**5. Sign Maintenance** - Sign 2000 can assist you with all of your sign maintenance needs. From simple lettering changes to electric sign problems, we are here to assist you.

# BANNERS, BALLOONS & FLAGS

**Banners** are an inexpensive way to get your advertisement put up. They can be used as a temporary means of advertisement or permanent one. They are made from a high quality material and can last a lifetime. If you ever need to change any information on your banner, just bring it into our shop we can change the message to whatever you want. Banners can be used to promote your Band, Wedding, Graduation Party, Grand Openings, and much, much more!

**Custom Shaped Advertising Balloons**  
Sign2000 Balloons specializes in producing your product into a giant inflatable balloons. We use only the finest quality fabrics, fans and sewing equipment. We want to give you a quote on your own custom balloon. No project is too small or too big. We specialize in quick delivery times so that you can fly your balloon at your next event. Some custom balloons are kept in stock and can be shipped same day.

**Flags**  
Bring life, color and attention to your special event or business with beautiful custom made flags from Sign2000. Outdoor signage and flags are great for outdoor sporting events and arenas, concerts, festivals or to draw attention to any storefront. Outdoor display products are strong, solid, stable and durable. Graphics are long-lasting and can endure exposure to outdoor elements.

- Promote new packages
- Sell high-margin products
- Offer discounts for referrals

### Medical Practices:

- Inform patients about new services
- Keep patients entertained
- Offer after-care products
- Drive social media campaigns

## FORMED PLASTIC LETTERS

ENDURING ORIGINAL

MADE FROM EARTH-FRIENDLY DURABLE PLASTIC

Our Cellulose Acetate Butyrate (CAB) formed plastic letters and logos are tough, weather-resistant, earth-friendly, and the first dimensional letters we manufactured 50 years ago. If you see a formed letter in your neighborhood, more than likely it's ours. The original.

**UNLIMITED STYLES, UNLIMITED COLORS**

Choose from 128 standard styles or we can dimensionally replicate your custom letter or logo art design. 31 standard pigmented plastic colors, or painted to match your custom color. Deep dimension at a relatively affordable price.

## LASER CUT ACRYLIC

QUALITY PRECISION

You're getting more than an acrylic letter. Because we extrude our acrylic sheet in-house, we formulate it with impact modifier to stand up to the toughest application challenges only found within the sign industry. And our acrylic letters and logos can be customized to virtually any custom graphic design, with laser-cut polished edges that can't be duplicated with a traditional router.

**More Choices:** Available in 32 standard pigmented colors or painted to your specifications, we have the widest offering of plastic pigments and thicknesses because we start with sheets of impact-modified acrylic extruded at our own plants.

## INJECTION MOLDED

MINNESOTA TESTED

- TOUGH ENOUGH FOR HARSH MINNESOTA WINTERS.
- REFINED ENOUGH FOR INTERIOR DISPLAY.
- Smooth returns, razor-sharp edges and unblemished letter faces give our injection-molded MINNESOTA letters the look and feel of cast metal in a plastic product.

LIFETIME GUARANTEE

## DISPLAY LETTERS

EXCEPTIONAL PRESENTATION **LISTED**

- Premium, high quality materials
- The distinctive look of metal without the weight
- Timeless, elegant gold leaf and premium hardwoods
- Finishes include metallics, pigmented colors, chromes, and hi-resolution bitmaps

LIFETIME GUARANTEE

## ILLUMINATED LETTERS

AFFORDABLE ILLUMINATION

- UL Listed components
- Letters will not dent, corrode or show adverse signs of weathering
- Revolutionary slimline GEMLITE products lit with low profile LEDs
- Cans and faces can be purchased empty or fully populated with LEDs

LIFETIME GUARANTEE

# METAL LETTERS

## METAL

R

FLAT CUT METAL

### FLAT CUT METAL

**DURABLE SOPHISTICATION**  
Precision-cut with high-pressure water jet and laser.

Stylish enough for the boardroom yet tough enough for the great outdoors, our Flat Cut Metal Letters and Logos are made true, from high-grade plate metal.

### MORE METALS, MORE FINISHES

From prime Aluminum, to Stainless Steel, to Bronze, to Brass, Copper, and Core-Ten® steel, we offer the widest range of metal alloys, finishes, and gauges. More choices - more options for you.

G

CAST METAL

### CAST METAL

**DISTINCTIVE CLASS**  
Banks, government buildings and universities have long favored our hand-finished cast aluminum and bronze letters for their classic look, deep dimension and durability.

### BUILT TO CUSTOMIZE

We offer the largest variety of font styles, profiles, finishing options, and the flexibility to customize for your client's needs.

**ENVIRONMENTALLY SMART**  
Manufactured in our all-electric, pollution-free furnaces, our customizable cast products are made from earth-friendly alloys free of lead and mercury.

A

STAINLESS STEEL FABRICATED

### STAINLESS STEEL FABRICATED

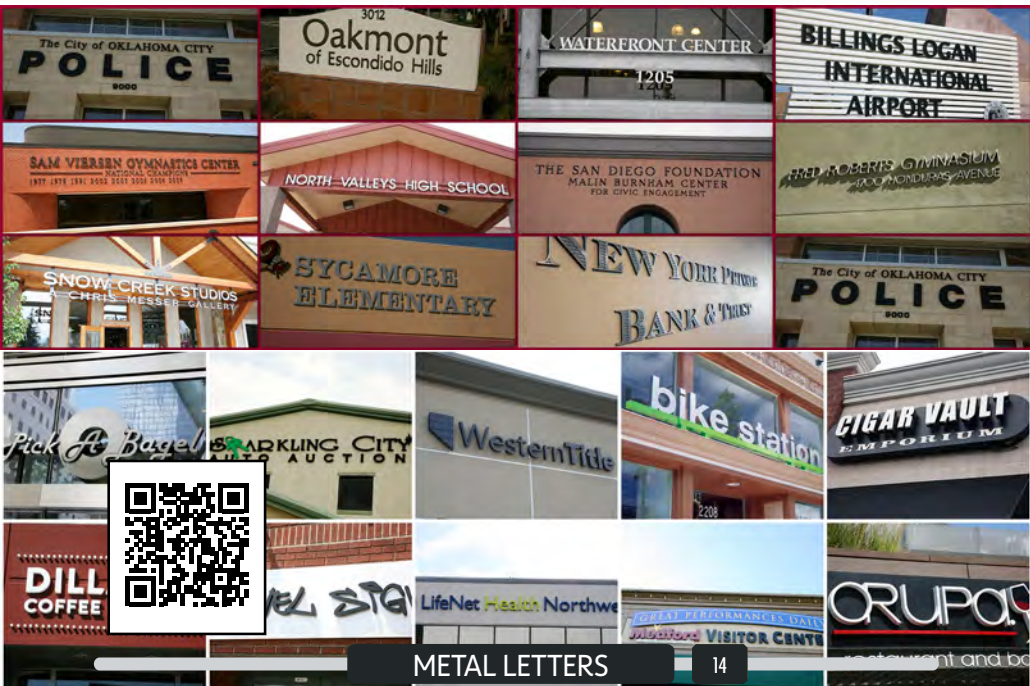

#### PREMIUM BEAUTY

Selected by industry giants such as Exxon, J.P. Morgan Chase, IBM and Caterpillar, our fabricated stainless steel letters project strength and stability without the added weight of comparable metal letters.

#### EXPERTLY CRAFTED

Our stainless steel, corrosion-resistant letters use lead-free solder and offer crisp, 90-degree edges for a longer-lasting, aesthetically superior alternative to aluminum channel letters.

PLASTIC LETTERS  
METAL LETTERS  
LIGHTING SYSTEMS

METAL LETTERS

## 1 Gooseneck Lights

Gooseneck lighting is a unique lighting originated with the desire to illuminate storefront signs. The initial style, as well as function, generated the need for compatible applications. Such as, overhead lighting of courtyards, and doorways, walks, and gardens. While all of these lighting fixtures have been designed and used for 'exterior settings, they can also add a dramatic interior affect. From restaurant salad bars, to contemporary kitchens. These lights are quite unique, and we are sure you will find them a valuable addition to any project.

## 2 Fluorescent Lights

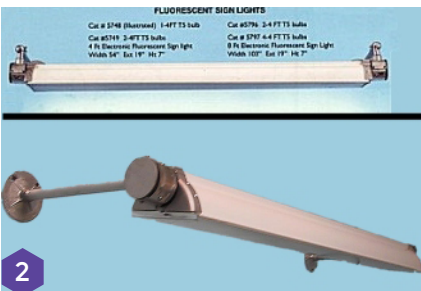

Outdoor, Self contained fluorescent sign light. The fixture comes complete for installation with integral electronic ballast, arms, and canopies. The integral electronic ballast is built into the fixture no need to place a remote ballast. Just wire and hang. Each 54 Watt T5 High Output bulb (not included) provides 5,000 Lumens of light.

## 3 Flatlights

These looked cool, ultra flexible animated posters. SIGN 2000 Flatlight uses EL (Electroluminescent) to manufacture striking signage. The above picture doesn't do the display justice, animation after the jump. So what exactly is SIGN 2000? This is how Flexmedia explain it: SIGN 2000 is essentially a flat light bulb sandwich consisting of layers of conductive and non-conductive plastic and a layer of phosphor. The phosphor is laminated between two conductive layers and, as a voltage is applied between the two conductive layers, or electrodes, the phosphor emits light energy. When a high-quality, high-resolution image is printed over the light, it behaves like a backlit sign.

## 4 LED Lights

Large electronic displays become more and more important and unreplaceable in new millennium. Because of its optical characteristics as well as long life time of LED lamps (more than 200,000 working hours) the possibility of their use is really wide.

Holds 12"x18" & 18"x24" Corrugated panels

# WEDDING INVITATION

## WEDDING INVITATIONS

A wedding invitation serves to inform invited guests of the date, time, place, and hosts of the wedding ceremony. It may also provide additional information such as the location and time of the reception, dress code, etc. The wording, lettering style, and ink color chosen to create a wedding invitation are essential in establishing and supporting a wedding theme.

## WEDDING ANNOUNCEMENTS

A wedding announcement serves to inform family and friends who weren't at the wedding that the couple has been married. Wedding announcements are often used when a couple has a small wedding or has eloped. They are also commonly used in the case of second weddings. Any invitation can easily be converted to an announcement with a simple change in wording.

## ENVELOPES

Unlined Inner Envelopes and Blank Outer Envelopes - Included FREE with all wedding invitations, unless noted otherwise in the item description.

YARD SIGNS  
WEDDING INVITATION  
LASER ENGRAVING

Luxury and style  
CRAFTED FOR YOU

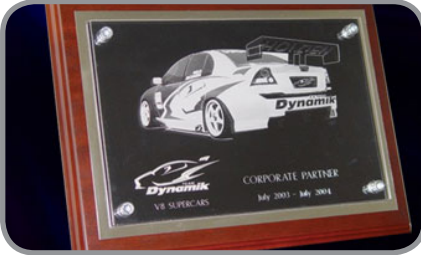

# LASER ENGRAVING

Laser Engraving is a much faster, economical and environmentally friendly alternative to screen printing, mechanical engraving or chemical etching.

The accuracy and level of detail achieved by our high-speed YAG and CO2 laser systems into a piece of metal, leather, glass, wood, acrylic, plastic or PVC and even on bend surfaces is simply amazing and unmatched by any other costly, lower quality engraving process.

With our Laser Engraving Services we can personalize any gift item for you from highly decorative luxury items to promotional and corporate products.

Our latest laser technology from United States, Germany and France combined with the creativity and expertise of our in-house designers has established our superior quality and service.

### State-of-the-Art Sign Material

We use state-of-the-art high density urethane to create most of our carved signs. Your choice of colors and textures is limitless and designs can be big or small. Every kind of letter, graphic, appliqué, background, and pattern is possible with no worries about knots or seams.

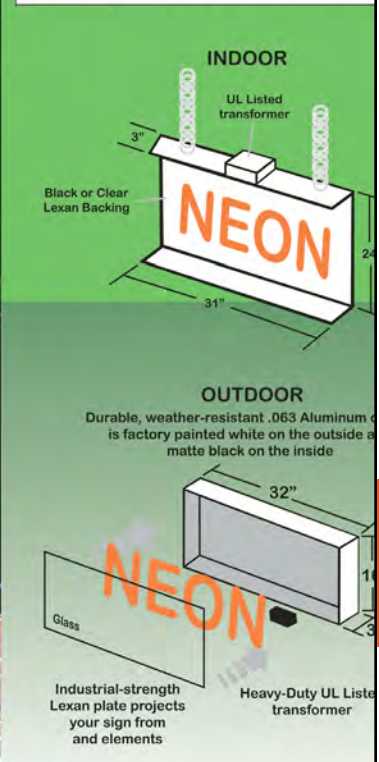

High density urethane and extrira® are both completely waterproof, unaffected by temperature or moisture, and incredibly resistant to chemicals. They won't crack, split or warp. Plus they're extraordinarily durable with a long life even in harsh environments. It also has excellent screw-holding capabilities and thermal expansion and contraction rates.

High density urethane is available in thicknesses from 1/2" to 12", and densities of 15, 18, and 22 lbs./cu. ft. Extrira® is available in 1 1/4" thickness.

## Gemini Standard Colors

Due to limitations in the printing process, printed colors can vary from actual colors. For an exact match of any color shown here, ask for a free color sample.

### Plastic Colors

### Painted Colors

Gemini also paint matches any PMS color.

\*Indicates colors that do not have a full gloss finish.

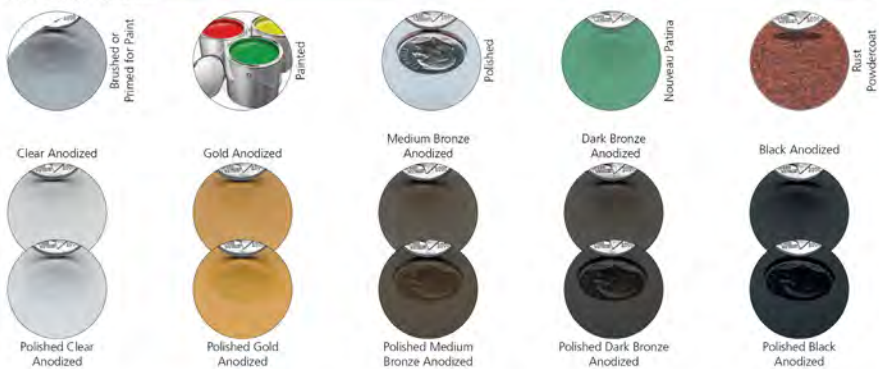

# FLAT CUT METAL FINISHES

## Standard Flat Cut Metal Finishes

### Aluminum Finishes

NOTE: Champagne and Light Bronze anodized colors also available. Gemini can match your shade of any standard anodized color. Actual color may vary from order to order due to the anodizing process.

### Bronze Finishes

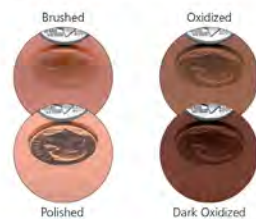

FINISH NOTES: All Patinas, by their very nature, will vary from letter to letter and order to order. These finishes will change in appearance over time depending on contact with moisture and temperature. Patinas can "bleed" onto the installation surface when installed outside. The only exception is the Nouveau Patina, which is a powder-coated, simulated Patina finish on an aluminum letter.
